

TODAY'S FAMILY DECK BOAT

Somewhere along the way in the creation of the **28 Fusion**, Essex lost track of their mission to build a great deck boat and committed to a much larger picture: the creation of a truly spectacular Performance Cat whose topside happens to embrace the deck boating lifestyle to the fullest possible capacity.

This aggressively styled and masterfully built Fusion is foremost a family boat, and Essex triumphed in this long-held company priority by every measurable standard and aesthetic benchmark. When called upon to do so, its newly tooled bottom transformed available power to fluid, comfortable and utterly controlled motion.

Essex held nothing back in the creation of their first-ever air entrapment boat, and the Fusion stands tall as one of the top new model releases in recent years. - "Performance Boats Mag."

ESSEX Performance Boats
